

Foundation Stage Family Learning Project

Theme: Where does the snow go?

Please complete at least one of the activities and return it to school before Friday 11th December.

Design and make a hibernation house for a hedgehog.

Think about how to keep the hedgehog safe, warm and dry over the winter months.

Draw a picture of Jack Frost and label him.

To extend your learning, ask an adult to write a sentence about him. Don't forget to use your Fred fingers!

Go out for a walk around your local environment, see how it is changing as the weather gets colder.

You could take some photos or draw a picture to share with the class. To develop your mathematical skills, look out for different shapes and patterns.

With an adult, investigate what happens when you put different liquids in the freezer.

Why not try ketchup or a fizzy drink. Record what you have found out.
