

Foundation Stage Family Learning Project

Theme: Did dragons exist?

Please complete at least one of the activities and return it to school before Friday 5th February.

Make up a dragon song or dance to share with the class.

You could use a well known piece of music to put words or movement to or even compose your own.

Create a dragon picture.

To extend your learning further, write words or sentences to describe it and/or count the number of teeth or scales on your dragon.

Do some research in to different reptiles.

- Find out about:*
- *their sizes and shapes*
 - *where they live*
 - *what they eat*

Present the information in whatever way you wish.

Read some dragon stories and watch some films with dragons in.

Create a poster or book review to tell people all about your favourite one.
