**I go to the of be she we me my was you your said they**

Choose a favourite book and keep a record of every time you see one of these red words - ask your adult to create a grid for you to record into, Which word appeared most often in your book?

Can you buy these pirate items with 1p coins? What about with a mix of 1p and 2p coins?

8p 	4p 	6p 
9p 	7p 	10p 

Can you learn this pirate song and dance?

<https://www.youtube.com/watch?v=8QQodiKmWtUE>

Can you play these pirate games?

<https://www.bbc.co.uk/cbeebies/games/swashbuckle-the-great-pirate-games>

Miss Lindal and Mrs Uzer would love to see what you are doing at home – please send them your photos to [HSWHomelearning@R-I-T.org](mailto:HSWHomelearning@R-I-T.org) write your teacher's name in the subject box of your email, thank you! Some reception children have been earning certificates at [www.themathsfactor.com](http://www.themathsfactor.com) why not give it a try?

Here are some science activities for you to try:

## Shaving Foam Rain Clouds

Science Experiment

### Method

1. Fill the small bowls with water, then add a different food colouring to each. The more food colouring you add, the darker the colour will be.
2. Fill your large glass or vase up to about 2/3 full.
3. Squirt a generous amount of shaving foam on top of the water to create a 'cloud'.
4. Drop small amounts of coloured water onto the 'cloud' using the pipette or syringe.

### You will need:

Clear glass or vase with a wide brim  
Food colouring  
Shaving foam  
Small bowls  
Water

## Rainbow Jar

### Science Experiment

### You will need:

A tall, clear jar/container  
Honey  
Golden syrup  
Washing up liquid (bright coloured)  
Olive oil  
Surgical spirit  
Water  
Food colouring  
A dropper/pipette

### The Activity

1. To start off, pour some honey into your jar, making sure you pour it into the middle of your container and that no honey touches the sides. Pour in enough to make a small layer at the bottom.
2. Colour your golden syrup using your choice of food colouring.
3. Pour the golden syrup into the jar, again, pour it into the middle of the container, avoiding the sides.
4. Add the washing up liquid on top of the golden syrup.
5. Choose a colour that isn't already in your jar and use food colouring to make water of this colour.
6. Pour the water in the middle of the jar, on top of the washing up liquid.
7. The olive oil goes in next, again being careful to just pour it in the middle of the jar. Pour in a generous amount of olive oil because it will act as a good divide between the water and the surgical spirit.
8. Finally, choose a colour that isn't already in the jar and colour the surgical spirit. Then, using your pipette, carefully drop the surgical spirit along the sides of the jar, so it sits carefully on top of the olive oil. Do not pour the surgical spirit.
9. You should now have 6 clear layers, all a different colours.
10. If you move the jar, be careful not to disturb the contents.
