

Welcome back to term 4!

We are excited to continue our learning journey 'Our World' this term. We have lots of fun and exciting activities planned and are looking forward to watching how the children practice, rehearse and develop new skills during busy time.

You should have now received your child's Numbots login details which were stuck in the front of their contact book. If you haven't received this yet please inform a member of staff. Numbots is a great online learning platform that supports children's addition and subtraction skills.

Last term, the children really enjoyed learning about maps and how to use them. They created their own fantastic maps and made suggestions on how we could improve our outside area.

On science day children enjoyed being scientists and carrying out different investigations, such as dissecting a flower, going on a wild plant hunt and discussing different seasons.

Year 1

Learning Letter

Term 4

This term's Super Six.

This term we will continue our learning journey 'Our World'. We will be focusing on what the weather is like in the UK and the seasons. We have carefully chosen the above books and video clips which will inspire the children on their learning journey.

We will be continuing to develop our knowledge of plants in science. We have planned some exciting science experiments to grow our own beanstalks.

In English this term we will be exploring different genres of writing, such as poetry and writing explanations, as well as developing our punctuation and grammar skills. The children continue to love the curious quest and the English challenges that are set by the faithful friends.

Subject specific information
