

Last term in Year 2:

Year 2 amazed everyone in Term 3 with their amazing knowledge of inventors and why they were important to our local area. They expressed their learning and understanding in a variety of collaborative and innovative ways.

Year 2 have made a great start in using Times Tables Rock Stars and we have been particularly impressed with their commitment and resilience. We look forward to seeing their progress continue this term.

We are now introducing fortnightly spelling rules that we practise daily and these words will be coming home to share and practise.

We are looking forward to another busy term and thank you for your ongoing support.

Mrs Cave & Mr Dunne

Year 2 Learning Letter Term 4

What can we learn from explorers and inventors?

As Year 2 continue with their learning journey, they will discover more famous inventors and explorers from around the world. They will be using their geographical skills to compare similarities and differences between the UK and Jamaica.

In science they will be completing an investigation to conclude what plants need in order to grow and survive.
