

Last term in Year 5:

Last term was truly explosive! We had a fantastic time designing, building and erupting our own volcanoes. When exploring the big question, "What is more destructive: earthquakes or volcanoes?" the children found it impossible to choose, they decided that both can be equally destructive.

Using our geography skills, we investigated where in the world earthquakes and volcanoes occur most frequently. We also deepened our understanding by learning about active, dormant, and extinct volcanoes.

Last term also marked the end of our sessions at MEAPA, where we saw lots of confident gymnasts performing a range of jumps on the trampoline and learn a routine that involved the balance beam, tucks and rolls.

Year 5 Learning Letter Term 3

Hoo St Werburgh
Primary School

This Term's Learning Journey

Est-ce que tu voudrais vivre en France?

This term, our learning takes on a journey of exploration through France. During our lessons, we will explore the Alps to identify the human and physical features, discover what attracts visitors each year and compare life in the alpine region with life in the bustling capital, Paris.

In addition to this, we will develop our art skills by studying the work of French artist Claude Monet and creating our own interpretations of his artwork.

We will also explore different foods within the French culture and take part in an exciting experience by developing a French recipe. This will help us taste a popular delicacy and feel as though we are truly in France.

Subject specific information

English	Diary entry, persuasive advert and newspaper article.
Maths	Multiplication, division, and fractions.
Science	Reproduction of plants
Geography	Est-ce que voudrais vivre en France? (Would you like to live in France?)
Art and DT	Developing a recipe.
RE	Are Sikh stories still important today?
Music	South and West Africa.
French	At the market.
Computing	Video production.
PE	Dance and handball.
